We are pleased to announce the 2018 Summer School programs of the Politecnico di Torino in the ICT/Engineering field:

- o **Building tomorrow society: NanoElectronics & Photonics** (July 9th - 13th, 2018).
- o **Building tomorrow society: IoT applications & data management** (July 16th - 20th, 2018).

Both programs are designed for undergraduate students who have completed at least two years of a Bachelor program in ICT (please see the attached flyers for specific requirements). For each course, participants will be granted **4 ECTS** upon successful completion of a final exam.
PoliTo Summer schools in ICT provide a wonderful opportunity to experience innovative teaching on ground-breaking topics, with theoretical lectures intertwined with hands-on experimental activities and company site visit.

Standard participation **fee** for each program is **600 €**. Early bird discount and discounts for students from partner universities are available, please check the website for details.
Favourable conditions for groups of students could also be applied.
The deadline for submitting the application is **June 11th, 2018**. Please note that candidates requiring a visa to enter Italy must apply by **May 15th , 2018**

Further information and online application are available at: www.polito.it/summerschools
If you have any questions related to the programs, please feel free to contact us at summer.schools@polito.it

Please forward this information to those who might be interested in our Summer Schools. We look forward to receiving your students next summer!
